TeamMed

TeamMed: Medical Planner App

SPONSORSHIP PROGRAM 2026

Give a family one less thing to carry.

TeamMed keeps a patient's entire care world in one secure app, so appointments go smoother for families and medical teams alike. Sponsors give the families they serve a full year free.

Easier visits for families

- **Calendar** keeps every appointment, scan, and follow-up in one place
- **Questions for Providers** saves questions between visits, so nothing gets forgotten in the exam room
- **History and Physical** is ready to hand any new provider, instead of filling out the same forms again
- **My Support Circle** lets family help with rides, errands, and updates

Better visits for care teams

- Up-to-date medication lists and **Trackers** for symptoms and vitals, not answers from memory
- Shareable PDF reports the family can print or email before the visit
- **Clipboard** compiles updates from hospital stays and home care into one report
- Less time piecing together history, more time for care

Born in the exam room, not the boardroom

Founder and CEO Susanne Riley spent 16 years as a surgical assistant before becoming a full-time caregiver. Co-founder Lauren Steakley, RN, brings years of chronic care experience. TeamMed is customizable to any condition, and every patient decides who sees their information.
